

HARIKRISHNAN RAVI

Senior .NET & Full Stack Engineer | Azure | SDK & ERP Integrations | AI-Assisted Development

+91 9445880150 | harikrishnan.r463@gmail.com | Chennai, India [LinkedIn](#)

PROFESSIONAL SUMMARY

Senior Software Engineer with 6.5+ years of experience architecting and delivering enterprise-grade applications using .NET 6/8/9, C#, ASP.NET Core, EF Core, SQL Server, Vue.js 3, and Azure Cloud Services. Expert in API integrations, ERP systems (Dynamics 365), AP automation workflows, and SDK implementations. Proven track record of optimizing system performance by 30-40%, implementing scalable architectures, and leveraging AI-assisted development for accelerated delivery. Strong background in Quartz Scheduler, Terraform automation and mentoring development teams in Agile environments.

CORE TECHNICAL SKILLS

Backend & Cloud	.NET 8/6, ASP.NET Core Web API, C#,MVC Entity Framework Core, Dapper, LINQ, REST APIs, Quartz Scheduler, Azure (Storage, Redis Cache, Key Vault, App Service, Functions), Terraform, JSON, XML
Frontend	Vue.js 3, TypeScript, JavaScript, HTML5, CSS3
Database	DB Design, SQL Server 2012-2019, T-SQL, Stored Procedures, Query Optimization, Performance Tuning, Indexing
AI & Automation	Agentic AI-Assisted Development, Prompt Engineering, Python Automation, Excel-to-SQL Migration Scripts
Tools & DevOps	Visual Studio, VS Code, Git, Azure DevOps, Jira, TFS, Service Bus,

KEY RESPONSIBILITIES

- Designed and implemented enterprise features aligned with the product roadmap, collaborating closely with product owners, architects, and cross-functional teams.
- Designed and implemented scalable backend services and RESTful APIs, ensuring performance, security, reliability, and maintainability.
- Troubleshoot and resolved complex production issues, delivering timely fixes and driving long-term system improvements.
- Provided technical leadership by mentoring junior developers, conducting code reviews, and enforcing coding standards and best practices.
- Implemented performance optimizations, monitored application health, and proactively addressed scalability and reliability concerns.
- Maintained clear and comprehensive technical documentation covering system design, workflows, and deployment processes.
- Actively participated in Agile practices including sprint planning, daily stand-ups, reviews, and retrospectives.
- Collaborated with DevOps and Cloud teams to support CI/CD pipelines, infrastructure automation, and production readiness.
- Worked closely with Data Engineering teams during data migration and validation activities to ensure data accuracy and smooth rollouts.

PROFESSIONAL EXPERIENCE

Senior Software Engineer

SGS Co — Chennai, India July 2023 – Present (Initially joined as Contract Developer via Talodyn Networks Pvt. Ltd. converted to Full-Time based on performance)

- Architected and developed the **Price Match Application** end-to-end from **requirements to production deployment**, using **.NET 8, EF Core, Vue.js 3, TypeScript**, implementing **role-based approval workflows, audit trails, and dynamic pricing rules**.
- Owned **full production deployment** and **post-go-live support** independently, handling release coordination, **monitoring, issue triage, hotfixes**, and ensuring **production stability**.
- Improved **application performance by 30–40%** by implementing **Azure Redis Cache** and optimizing data access using **Dapper**.
- Automated **Azure infrastructure provisioning** using **Terraform**, reducing manual deployment effort by **~70%**, and managing **CI/CD pipelines** via **Azure DevOps**.
- Implemented **Microsoft Graph API** integration to fetch **Azure AD group details** and cached authorization data in **Azure Redis Cache**, reducing **API calls** and improving response time.
- Used **Azure Monitor** and **Application Insights** to track application health, failures, and performance metrics, enabling **proactive issue detection** and **faster resolution** in production.
- Developed and maintained **unit and integration tests** using **xUnit / NUnit** and **Rhino Mocks / MOQ**, ensuring **code quality** and reducing regression issues.
- Leveraged **AI-assisted development** and **Prompt Engineering** to accelerate backend development, refactoring, and **automated test creation**.
- Developed **Python automation scripts** for **Excel-to-SQL data migration**, transformation, and validation workflows.
- Collaborated with **Data Engineering teams** on **large-scale data migrations** and production rollouts; participated in **architectural reviews** and **mentored junior developers**.

Phoenix – Legacy .NET Framework Modernization

- Worked on **Phoenix**, a short-term, high-priority project involving **legacy .NET Framework code** enhancement and stabilization for urgent business requirements.
- Integrated **Avalara SDK** to support **tax calculation specifically for invoice generation** workflows.
- Implemented **Dynamics 365 integration** for **invoice PDF generation**, where invoice data was sent in **JSON format** to D365 services.
- Captured **invoice posting status asynchronously** using **Azure Service Bus**, ensuring reliable confirmation of successful invoice creation.
- Built and maintained a **Windows Service in .NET 6** to listen to Service Bus messages and process invoice status updates.
- Ensured minimal impact on existing legacy systems while delivering changes within tight timelines.

Senior Software Engineer

Odessa Solutions Pvt. Ltd. — Bengaluru, India | Dec 2021 – Mar 2023

About: Global platform powering end-to-end leasing and loan lifecycle management for large financial institutions

- **Actively participated in the entire SDLC, including requirement analysis, estimation, development, testing, deployment, and post-production support.**
- Worked in an **Agile environment**, using **JIRA** for sprint planning and tracking, **Git** for version control, and **SQL Profiler** for performance troubleshooting and optimization.
- **Developed and enhanced enterprise-grade financial leasing modules** using **ASP.NET MVC, Web API, Entity Framework, SQL Server, and WPF**, supporting core business workflows.
- **Improved database performance by ~35%** by optimizing **complex stored procedures and queries** through indexing and query restructuring
- Took ownership of **end-to-end deployment activities**, coordinating **releases**, handling **production issues**, and ensuring **application stability post-deployment**.
- **Mentored junior developers**, providing guidance on **code quality, best practices, and feature implementation**, while supporting team delivery goal

Engineer — Technology

Virtusa Consulting Services Pvt. Ltd. — Chennai, India | Jun 2019 – Dec 2021

Project: HealthStream Learning Center (HLC) — NASDAQ:HSTM

- Built and maintained healthcare learning management system modules using C#.NET, ASP.NET Web Forms, ASP.NET MVC, SQL Server, LINQ
- Performed comprehensive unit and integration testing using Rhino Mocks and MOQ frameworks ensuring code quality
- Optimized stored procedures, enhanced UI workflows with JavaScript/jQuery, and resolved critical production issues

KEY PROJECTS

AP Invoice Automation Platform

Built automated AP processing workflows using .NET 9, Quartz Scheduler, and Dapper. Implemented scheduled jobs for invoice sync, vendor-specific matching algorithms, notifications, cleanup, and background maintenance. Used Dapper for performance-critical data access handling high-volume AP operations

ACHIEVEMENTS & RECOGNITION

- Delivered Price Match Application from requirements to production deployment in an enterprise environment.
- Awarded Standing Ovation Award (Q4 FY24) and Team Work Award for outstanding contributions.
- Converted from Contract to Full-Time Employee based on performance and ownership of critical systems.
- Recognized as a key contributor for end-to-end delivery of enterprise applications and complex integrations.
- Certified on Azure AI Fundamentals.

EDUCATION

B.Tech – Information Technology | Agni College Of Tech, Anna University | 2015-19 | CGPA: 8.0

Higher Secondary (HSC) | 2014-15 | 88%

Secondary School (SSC) | 2012-13 | 92.6%

HOBBIES & INTERESTS

- **Reading Books:** Passionate about technology and self-improvement
- **Mentoring College Students:** Actively mentor students on career paths, technical skills, and industry best practices
- **Gardening:** Cultivating plants and maintaining green spaces for relaxation and mindfulness
